

## Thermowells

PTFE or PVDF Jacketed Steel

Product Specifications 5.4-2

### Materials:

Available in solid PTFE, Monel, PVDF, or jacketed steel pipe. For other materials, contact factory.

### Liners, Jackets and Seals:

Virgin PTFE, Monel, or PVDF.

### Connection:

Available in a wide variety of connection options, such as 3/4, or 1 NPT, socket weld, weld-in, raised face flanged, or Tri-Clamp. Other threaded sizes, connection options are available, contact factory.

### Insertion Length:

Insertion depths can be accommodated by specifying the length that runs from the base of your threads to the tip of your thermowell. For maximum performance, this length must equal or exceed the length of the stem or bulb. We can accommodate all sizes.

### Bore:

This section that holds your temperature elements can be modified to fit your needs.
